Protect Your Garage Door During Garage Door Safety Month

[CITY, STATE] (DATE) – (Insert Company Name) is proud to join the [International Door Association](#) (IDA) in observing Garage Door Safety Month this May. Throughout the month, [COMPANY NAME] will raise awareness about the importance of proper garage door maintenance and safety for homeowners.

“Garage door safety begins with awareness,” said [Company Representative Name, Title] of [Company Name]. “Garage Door Safety Month gives homeowners the opportunity to learn simple steps that make a substantial difference. We encourage families in [City] to take a few minutes to look, listen, and learn the basics of garage door safety.”

The garage door is the largest moving appliance in most homes and plays a key role in household safety and security. Regular maintenance and awareness of warning signs can help prevent accidents, reduce costly repairs, and extend the life of the system.

During May and beyond, (Company Name) reminds homeowners to remember these garage door safety tips:

1. **Look:** Visually inspect garage door from top to bottom, check that panels are not cracked, hinges are not bent, and all bolts are secure. Ensure there is no rust and no gaps between panels.
2. **Listen:** Listen for unusual noises such as squeaking or squealing. Call a professional if you hear strange noises.
3. **Learn:** Learn safety practices that come with using a garage system.
4. **Remember:** Keep these tips in mind. Know that if something is out of place or does not sound right, it is time to call a trained professional.

If you suspect an issue with your garage door system, contact [Company Name] at [Phone, Email, or Website] to connect with a qualified professional.

###

The International Door Association (IDA), founded in 1995, works to provide programs and services to door and access systems dealers, for the express purpose of enhancing their value and professionalism. Door and access systems dealers sell, install and service a vast array of products including Residential Doors and Operators, Commercial Doors and Operators, Fire Doors, and Gates. Visit us at www.doors.org.
